Press Release

Aurora, ON. June 2 2010: Ario Khoshbin, President of Prollemium Medical Technologies Inc., a privately held specialty medical device company, reported today that his firm will continue to record strong year on year gains in revenues and profitability for its 2010 Fiscal Year ending June 30th. Over the past five years, Prollemium has recorded aggregate revenue growth of more than 524% ranking it amongst Canada's fastest growing firms.

This year marks the fourth time that Prollemium's rapid growth has been recognized by PROFIT magazine in its ranking of Canada's Fastest Growing Companies. Once again, Prollemium Medical Technologies is the only Canadian medical device company to make this exclusive list.

"Canada's Fastest-Growing Companies are the poster children for entrepreneurship, innovation and pure tenacity," says Ian Portsmouth, editor of PROFIT. "They demonstrate what it takes to succeed in today's highly competitive, technology-driven global economy."

Commenting on his firm's dynamic growth and development, Mr Khoshbin points out that "Prollemium is engaged in an exciting, ever growing industry sector. With a full line of products to address the needs of the aging face, we have been able to keep up with the demands of this exciting market."

Speaking on his firm's presence in over 60 countries, Mr. Khoshbin continues, "We have capitalized on the success of our popular Revanesse Dermal Filler by forging partnerships with influential pharmaceutical and medical device companies in key foreign markets. These partnerships have enabled us to increase our market share and establish a strong global presence."

Furthermore, Prollemium Medical has recently finished a 118 patient, double blind study that is being used for entry into the lucrative US market.

In addition to the Revanesse Family of Dermal Fillers, Prollenium manufactures a full line of physician grade skin care and will soon be launching a new injectable treatment for pain associated with osteoarthritis as well as novel products for the dermal filler and wound healing markets.

Says Khasha Ighanian, VP “We are very happy with our growth over these past 5 years and by leveraging the efforts of our strong R&D team with our ability to bring new products to the market quickly we are extremely optimistic about the next 5 years as well”.

About Prollenium

Founded in 2002, Prollenium Medical Technologies, Inc is headquartered in Aurora, Ontario. The company is widely recognized as a leading manufacturer of medical devices used in cosmetic and plastic surgery treatments worldwide. The company’s flagship REVANESSE™ product line (www.revanesse.com) is widely used to erase facial lines and wrinkles, smooth deep folds and give lips a natural fuller look.
