Attention Business Editors:

**PROLLENIUM MEDICAL TECHNOLOGIES INC. RANKED AMONG CANADA'S  
TOP 50 EMERGING GROWTH COMPANIES BY PROFIT MAGAZINE**

**The Only Medical Device Company To Make This Exclusive List,  
The PROFIT HOT 50 Represents The Most Definitive Guide On  
Canada's Emerging Growth Companies**

(TORONTO, September 26, 2006) – ProlleNIUM Medical Technologies Inc. has emerged as one of Canada's fastest growing companies in 2006 according to the 7<sup>th</sup> annual PROFIT HOT 50 ranking published in the September issue of *PROFIT: Your Guide To Business Success* and online at PROFITguide.com. ProlleNIUM is the only Canadian medical device company to make this exclusive list that tracks the two-year revenue growth of young companies.

“The PROFIT HOT 50 companies represent the ambition, sophistication and immense contributions of Canada's entrepreneurial sector,” says editor Ian Portsmouth. “PROFIT is proud to celebrate the success of these businesses and to share their growth strategies.”

Founded in 2002, ProlleNIUM Medical Technologies Inc. is a leading manufacturer of medical devices used in cosmetic and plastic surgery throughout the world. ProlleNIUM recently launched its line of cutting-edge dermal fillers – Revanesse, Revanesse Ultra and ReDexis – into the Canadian market. The company has also signed several major international distribution contracts with medical device companies in Europe, South America, the Middle East and Asia, a move that has been a key contributor to the company's growth.

“Our ability to make this elite list in an extremely competitive market dominated by large companies is a testament to the quality of our products and our tireless pursuit of excellence,” says Vice-President Khasha Ighanian. “This ranking also solidifies management's belief in human resources as a key driver for growth and success within the organization.”

Based on sales to date, Prolenium projects a doubling of revenues in 2006. Prolenium's growth strategy for Canada in 2006/2007 includes aligning the company with several top physicians, dermatologists and plastic surgeons throughout the country, as well as launching its line of capital equipment including Carbon Dioxide Therapy and Pulsed Light machines. Prolenium has also increased its budget for research and development and has several projects in the pipeline including a Botulinum Toxin Type A for injection and the company's first direct-to-consumer offering, a line of skin care products expected to launch in late 2006.

"Part of our continual success is our ability to be at the forefront of advancements in medical technologies and offer safe, viable products to physicians around the world," affirms President Ario Khoshbin. "We intend to continue this growth with ongoing drive and dedication."

United States FDA approval is currently pending on Prolenium's range of dermal fillers and the company expects to tap into the \$200 million dollar American dermal filler market toward the end of 2007.

"This is a very exciting time at Prolenium," says Khoshbin. "We have some very exciting products and a highly talented development team that we believe will keep us at the forefront of Canadian medical biotechnology companies for many years to come."

#### *About PROFIT: Your Guide to Business Success*

*PROFIT: Your Guide to Business Success* offers news, strategies, tips, interviews and other resources to the CEOs of Canadian growth companies. Each year *PROFIT* – which currently reaches more than 370,000 readers nationally – hosts a number of events that bring together business leaders in the fast-growth segment and champions the interests of those leaders. *PROFIT* was founded in April 1982 as Canada's first national magazine geared to entrepreneurs.
